

PRODUCT OVERVIEW · 2026

# Run your cleaning company from your phone.

Medja is the all-in-one operations app for Nigerian cleaning businesses: residential, office and post-construction. Scheduling, staff, quotes, naira invoicing and Paystack payments, all in one place.

Android-first PWA

Naira payments (Paystack)

WhatsApp-native

Built for Nigeria

## WHAT IS MEDJA

# One app to run the whole business

Nigerian cleaning companies juggle phone calls, WhatsApp groups and paper job cards to run jobs, and lose money to untracked cash, missed invoices and no-shows. Medja replaces all of it with a single, mobile-first system the owner and every cleaner can use, and it collects money the Nigerian way.

~83%

of Nigerian phones run

WhatsApp to clients

## THE PROBLEM IT SOLVES

### Where cleaning businesses leak money

#### Paper job cards get lost

No record of what was cleaned, by whom, or what the client agreed to pay. Disputes end in write-offs.

#### WhatsApp isn't a schedule

Owners burn hours chasing teams by call; nobody knows who is at which site.

#### Cash goes untracked

Field cash, unmatched transfers, forgotten invoices, and global tools can't even collect naira.

#### The insight

Global apps like Jobber, ZenMaid and Housecall Pro have **zero Nigerian payment support**: no Paystack, no bank transfer, no USSD. Medja is built naira-first, WhatsApp-native and Android-first for exactly this market.

# Everything a cleaning company needs

Organised around how the business actually runs, from booking a job to getting paid.

## 1 Scheduling & jobs

- Job calendar (day / week)
- Residential / commercial / post-construction
- Reschedule, edit & cancel
- Digital job cards
- Per-type cleaning checklists
- Recurring contracts auto-book jobs

## 2 Field app for cleaners

- "My Jobs" on any Android phone
- Before & after photos
- Dispatch & team assignment
- GPS check-in / check-out
- On-site checklist ticking
- Works on low-end phones, low data

## 3 Staff & trust

- Vetting: NIN / ID + guarantor records
- "Verified cleaner" card to clients
- Payroll runs (per-job / day / month)
- Background-check status
- Attendance from GPS check-ins
- Client ratings per staff

## 4 Money & payments

- Naira quotes by room count
- Paystack links: card · transfer · USSD
- Receivables & invoice aging
- Invoices with VAT & deposits
- Cash logging & reconciliation
- Print / save invoice as PDF

## 5 Grow & understand

- Owner dashboard & revenue chart
- Public booking link (WhatsApp / IG)
- Expenses & profit view
- Reports: revenue, top clients, churn
- Multi-site rollups for corporates
- WhatsApp reminders & notifications

# Built for Nigeria, not adapted to it

## It collects money here

Paystack card, bank transfer and USSD, cash logging and naira invoicing. This is the single gap no global competitor fills.

## Android-first & light

Installs to the home screen, sips data and runs on cheap phones, for the owner and every cleaner in the field.

## WhatsApp-native

Quotes, invoices, reminders and verified-cleaner profiles all send in one tap, where Nigerian clients already are.

## Solves the trust problem

Staff vetting with ID and guarantor records, plus a "verified cleaner" card sent before every visit.

## PRICING

### Simple naira plans, billed via Paystack

#### Starter

**₦15,000**/mo

- ✓ 1 owner + up to 5 staff
- ✓ Jobs, quotes & invoices
